

UNDERSTANDING YOUR WATER BILL

A Guide For Properties

Understanding and reading your water bill can be confusing. Different water districts and providers can display your usage differently, and have separate billing processes. Help is here! Below you will find some tips and steps for understanding your water bill and determining usage.

1. Check CCF for Consumption

Water use is billed upon a unit of measure called a CCF (centum cubic feet). 1 CCF = 100 cubic feet = 748 gallons.

San Jose Water Company
110 W. Taylor St.
San Jose, CA 95110-2131
(408) 279-7900
Office Hours: 8:00AM-5:30PM Mon.-Fri.

2. Determine Billing Period

Utility billing periods vary (in most water districts meters need to be physically read by water district representatives). Check your bill to determine the billing period that you are being charged for.

3. Analyze - what is your water data telling you?

Reading and monitoring your water bill is the first step in efficiently managing our precious water resources.

Look out for spikes in usage that may indicate you have a leak. Monitor your water-conservation progression throughout the year to determine any patterns. With your help we can reduce water **use**, **waste** and **loss**.
